

Alexandre Ribeiro

Software Engineer

(+351) 914 113 629 | alexandrembribeiro@gmail.com | LinkedIn: alexandrembribeiro | Git: alexmbribeiro

Education

Instituto Superior de Engenharia do Porto

BSc Degree in Software Engineering

Porto, Portugal

Sep. 2022 – Jun. 2025

Skills

Languages TypeScript, Python, Java, C#

Developer Tools RabbitMQ, Traefik, Doppler, Prometheus, Grafana, Git, Docker

Software/Frameworks Node.js, Express, React, MQTT, PostgreSQL, REST

Soft Skills Critical Thinking, Adaptability, Growth-oriented

AI/LLM LLM Deployment, Multi-agent Orchestration

Experience

CeNTI

R&D centre for nanotechnology and smart materials

Vila Nova de Famalicão

Jan. 2026 – Present

Researcher

- Deployed and operated a self-hosted LLM on an internal GPU cluster, serving 24 users across two teams. Managed the full infrastructure stack and capacity constraints
- Built multi-agent orchestration workflows, enabling parallel task execution and improving team productivity
- Built an AI code-review agent powered by the locally deployed LLM, integrated into GitHub Actions to automatically analyze pull requests, post review comments, and notify developers via Microsoft Teams adaptive cards
- Developing backend microservices for IoT systems in Node.js and TypeScript
- Containerized infrastructure with Docker and Traefik as reverse proxy
- Observability stack with Prometheus and Grafana for real-time metrics
- IoT protocol integration with MQTT and CoAP for device communication
- Secrets management with Doppler across multiple environments

Fashable AI

Remote

Internship

Fev. 2025 – Jun. 2025

- Developed an AI Agent for collecting, processing, and analysing visual fashion trends on Instagram, targeting applications in digital behaviour and style forecasting.
- Built in TypeScript, following SOLID principles, Onion Architecture, and C4 model for documentation and system design, ensuring modularity and scalability, and structured the system in a monorepo setup, enabling clean separation of concerns.
